SUMMARY

Front-end focused full-stack developer with 5+ years of experience. I build user-centric, high-performance web applications using React, Next.js, Node.js, and Laravel. I contribute from analysis and design through implementation and release, with a focus on sustainable code quality and measurable impact.

EXPERIENCE

Full-Stack Developer, Copetract - Ankara, Turkey   June 2025 - September 2025

- Built a contract tracking and management application using Next.js (frontend) and Laravel (backend).
- Focused on frontend development; delivered responsive, modern UIs with Next.js.
- Contributed to backend API development with Laravel and MySQL integration.
- Improved frontend architecture and user experience across the project.
- Worked end-to-end while specializing in frontend technologies.

Frontend Developer Intern, Malwation - Istanbul, Turkey   June 2023 - September 2023

- Learned HTML and CSS fundamentals through hands-on projects.
- Gained experience with DOM manipulation in JavaScript.
- Applied responsive web design principles for mobile and desktop.
- Used Git version control for team collaboration.
- Studied basic web security concepts and frontend framework basics.

Freelance Developer, Bionluk Platform - Remote   2020 - Present

- Develop user-friendly, interactive interfaces for web applications and websites.
- Build dynamic websites that interact with databases.
- Work across diverse client projects, strengthening communication and project management skills.
- Deliver web solutions using modern technologies and best practices.
